

Dear Reader:

I am providing this information at no charge because I have been blessed by it and want to extend that blessing on. I also have tried various programs to make money without success and have in fact lost money through that. I want others to be able to profit without having to spend a fortune to try it out. With this program, you will remain in control of your funds (with the exception of the minimal fees for transferring funds) and be able to track your profit daily.

What do I get out of it? Well, since I am providing this information at no cost I am only asking that you would be kind enough to use the links I've provided to be sure that I receive credit for referring you if you decide to use this information. That will allow me to receive a small affiliate commission and will cost you absolutely nothing. In fact, you will receive \$.05 in your Liberty Reserve account for being referred.

Then, you are free to use this same document (and replace my referral numbers with your own) and pass it on to earn affiliate commissions for yourself if you so choose.

Thank you and God Bless!

Becky

Five Steps to Financial Freedom

1. Go to <http://www.libertyreserve.com/?ref=U2006433> and register for a FREE account.
2. Go to <http://www.largesum.com/?ref=abundant> and register for a FREE account using your Liberty Reserve account number from step 1.
3. Go to <https://www.goldexchange.eu/index.php?lang=en> and complete your “Buy E-Currency with Bankwire” form. You may use of the the alternative exchangers listed at <https://www.libertyreserve.com/en/exchangers> as well.
4. Once you receive the email from Gold Exchange with instructions needed to wire the money, take the information to your bank and wire your desired amount of money to be put into your Liberty Reserve account (minimum net amount of \$150 USD – there will be a small fee from Gold Exchange which can be computed using their tools and bankwire fee(s)).
5. Sign into your LargeSum.com account and start the program of your choice.

Obviously, the more money you can deposit, the more money you'll make. Whatever program you decide to use, be sure to note the frequency of interest withdrawals that are allowed. This is important to maximize your profit. For example, if you use Profit Run and withdraw the profits at the 30 business day mark, you can then start a First Step program with that profit. Both programs will mature on the same day (60 business days from the beginning of Profit Run). You can then take the Profit Run initial investment and all accumulated interest, along with the First Step initial investment and all accumulated interest, and deposit them into a new program(s).

If you can and are willing to follow the directions above, as well as the the policies and instructions of the individual sites listed above, you should be in profit mode within 30 days.
