

2003 Avalanche 1500 2WD

Features of the Truck

What makes this truck unusually attractive?

- Very low mileage – as of 3/22/2008, 23704 miles
- One owner
- The vehicle has never been in an accident
- This is a non-smoking vehicle
- The truck has always been kept in a garage
- The truck is exquisitely maintained
- All maintenance service has been performed by the dealer
- Only one type of oil has ever been used in the engine (Castrol GTX 5W30)
- Even though equipped with heavy duty trailering equipment, the vehicle has never been used to pull a trailer
- A complete service history is available with original service receipts. This history is posted on this web site as a PDF document
- A complete mileage and gas consumption history is available. This history is also posted on this web site as a PDF document
- All original paperwork associated with the sale of this vehicle by Ivan Leonard Chevrolet of Hoover, Alabama to me, as the first and only owner of this vehicle, is available. This includes the original window sticker and the Odometer Disclosure Statement, pictures of which are also posted on this web site.
- The following accessories are also included with the vehicle:
 - Chevrolet produced storage bag for the rigid composite cargo cover panels.
 - The heavy-duty trailering equipment does not include a draw bar. I am supplying a trailer hitch draw bar with two quick exchange balls in two sizes (2" and 1-7/8") – this equipment has never been used and is rated at 10,000 lbs.
 - Neither does the trailering equipment package include a wiring harness to hook up the electrical supply to a trailer. Such a wiring harness is supplied.
 - To secure the draw bar to the trailer hitch and prevent theft, I am also supplying a specially designed locking bar for this assembly.
 - Finally, I am supplying an accessory light that is mounted up and locked with the locking bar when the draw bar is not in use.

If you go to the Accessory link on the web site, there are pictures of these items.

Features and Options Installed By The Manufacturer:

Standard Safety and Security Features

1	Dual level front driver and right front passenger air bags with right front passenger sensing system.
2	Four wheel disc brakes with ABS
