

Jelly Roll Quilt sizes courtesy of Ethel Granger

Each jellyroll strip covers 84 square inches.

40 strips cover 3360 inches without border

Use this formula to calculate for whatever size you want: for example ---

$36 \times 36 = 1296$ sq. ins. divided $\times 84$ (sq. ins. per strip) = (15.4) 16 strips - 18" off at start

$45 \times 45 = 2025$ sq. ins. divided $\times 84$ (sq. ins. per strip) = (24.4) 25 sts. - 18" and so on.
