

BEAT THE HEAT!!!

It's that time of year again, and the aquarium thermometers are starting to rise. If this is the first summer your aquarium has seen, or if perhaps you have upgraded the aquarium's lighting since last summer, you might be finding yourself in a predicament - the aquarium is too hot.

AQUATEK COOLING FAN SERIES offers you an economical and effective way to reduce temperature buildup by 5 to 7 degrees. The fans provide powerful ventilation to reduce heat transference from aquarium equipment and are perfect for aquarium stands/cabinets or sumps areas to reduce humidity.

- Increase air movement to reduce heat and humidity
- Extends longevity of your lights and improve efficiency of your chiller
- Easy-to-install, attachable to vertical and horizontal surface

COST SAVING TIPS

Frequent usage of cooling fans extends longevity of your lights and improves efficiency of your chiller

VENTILATION TIPS

1. Use cooling fans in warm areas with poor ventilation, or in areas with equipment that generates excess heat and/or humidity.
2. Maximize air movement in an enclosed area. Place one unit on one end to introduce cool, fresh air and the other unit on the opposite end to exhaust the warm air. The cross-ventilation will work best to reduce heat generated by aquarium equipment.

AQUATEK COOLING FAN SERIES

Model # AQT-F01

- **NO ASSEMBLY REQUIRED**
- **EASY INSTALLATION**
- Lower power consumption
- Adjustable direction of air flow
- Rust-proof metal grill
- Dimension: 3.25" x 3.25" x 1.25"
- Air Flow: 28.68CFM
- *Recommended for tanks up to 10 gallons*

Model # AQT-F02

- **NO ASSEMBLY REQUIRED**
- **EASY INSTALLATION**
- Lower power consumption
- Adjustable direction of air flow
- Rust-proof plastic grill
- Dimension: 5.5" x 4.75" x 1.34"
- Air Flow: 31.57CFM
- *Recommended for tanks up to 20 gallons*

AQUATEK COOLING FAN SERIES

Model # AQT-F04

- **NO ASSEMBLY REQUIRED**
- **EASY INSTALLATION**
- Lower power consumption
- Adjustable direction of air flow
- Rust-proof plastic grill
- Dimension: 11" x 4.75" x 1.34"
- Air Flow: 38.56CFM
- *Recommended for tanks up to 40 gallons*

Model # AQT-F06

- **NO ASSEMBLY REQUIRED**
- **EASY INSTALLATION**
- Lower power consumption
- Adjustable direction of air flow
- Rust-proof plastic grill
- Dimension: 16" x 4.75" x 1.34"
- Air Flow: 45.55CFM
- *Recommended for tanks up to 60+ gallons*
