Another Application of the 1260, 1290, 1335, Showing the Restoration of Israel and the Return of the People to the Land.

Most Bible student are familiar with the 1260, 1290, and the 1335 years from Daniel, which are reckoned and applied at a day for a year. The table on the previous page explores the possibility that there is a second application of the 1260, 1290, and 1335 years. The left hand column shows the ten tribes losing civil power to Assyria. That date is only true if the 20-year fix is made in the time of Judges and the end of Jerusalem. We next see Babylon conquering Judah and the total loss of the nation. This is what we would call the traditional application. It shows the power eventually transferred to Rome and from there to Papacies 1260 years. The prophecy finishes out with the judgment of the true churches enemies during the 40-year harvest. The end time occurred gradually in steps of 1260, 1290, and 1335 years. There was a gradual restoration of the truth as well as a separating from the false system at each of these steps. **Blessed were those of the church who reached that point in time, especially 1874.** The kings, who illegally held power with Papacy during the dark ages, are destroyed at the end of the 40-year harvest in 1914, which **was 2520 years after Nebuchadnezzar of Babylon first attacked Palestine in 607 BC. The loss of civil power by Papacy in 1799 AD is 2520 years after the original loss of power to Assyria by the ten tribes.**

In the second application, we start with the date that Nebuchadnezzar is called the head of gold and the rise to power of Babylon over Palestine. Next instead of Papacy, 1260 years later, we see the Moslems taking literal control of the holy land. We then go another 1260 years to the end of WWI. It was during that war that Britain took control of Palestine away from the Moslems Turks. After that time, the time line shows the restoration of the literal nation of Israel back to their land. In this application of the prophecy, we find it pointing just after the important dates of 1917, which was when Britain made a proclamation that the Jewish people should have a home in Palestine. Collapse of Turkish resistance in Palestine in 1918. Islamic Arabs no longer in control of Palestine. That was exactly 2520 years from the time that Neb took complete control of Palestine (602.75 or 603 BC). **That was the very year that he was called the head of gold in Daniel chapter 2.** With that change in the start year, the 1290 reaches to 1948, which was when the war for independence began.

The 1335 years reaches to 1993, which was about the time that the Russian empire finished disintegrating. The fall of Russia was important for Israel because they were the arms supplier to their enemies, the Arabs. **Also because the Russian empire had collapsed, the Jewish people who had been trapped there were now free to return to Israel and large numbers of them have done so. Blessed are the Jewish people who reached that time and who returned to Israel.**

Because the Palestinians had lost their arms supplier and the support of other Arab countries, they were forced to try to make a peace deal with Israel. This began in 1993, exactly where the second 1335 pointed. Both Israel and the PLO signed a peace document. It was signed on Sept 13, 1993 and called "Declaration of Principles On Interim Self-Government Arrangements". In this agreement both parties agreed to work towards a final peace that would include self-government for the Palestinians, and the right to exist for Israel. In a letter from Arafat to Rabin, dated Sept 9, 1993, the PLO recognized the right of Israel to exist in peace and security. The PLO affirmed that all operating provisions of their covenant that were inconsistent with the commitments of the letter were to be declared inoperative and no longer valid.

Even though the Palestinians signed the peace agreement, almost everyone admits that they have not lived up to it. We think that since they signed the agreement, God is going to hold them accountable for it. If they persist in trying to destroy Israel or in trying to get complete control of Jerusalem God will have a reckoning with them. Since there is a 40-year harvest and then judgment at the end of the spiritual house, we may find a similar period at the end of the civil power section although we are not certain that it is 40 years. If it is the end of that time in 2033 may be when we find Israel restored to full favor and Islam shown to be another false prophet. That would not be the end of the church, which would have to be gone by that time, but it could be the time the New Covenant would come to the earth, and by which Israel's enemies would be permanently defeated. The date that the Berlin wall fell, Oct 1989, is also on the chart, but only if we take into account the 3.5 +3.5 year overlap, which we find at all of the major node points. That 3.5-year overlap exists on all of the time lengths of 1260, 1290, 1335 and 2520. This seems to show that God designed the events to occur over a 7-year span.
