

CSCI 1990 ASSIGNMENT 2 SPRING 2009

DUE FEBRUARY 17

Write a Java program that determines how many years at a million dollars a day that it would take to pay back the economic stimulus plan, excluding interest.

- Ask the user the dollar amount of the stimulus. As of typing this, the current estimate was 383 trillion dollars.
- Using the Scanner class, input that value.
- Compute how many years.
- Output the result.
