

# CSCI 3500 ASSIGNMENT 2 FALL 2009

## DUE NOVEMBER 5

Create a webpage with at least three frames (seamless) and a table. Twenty percent of your grade will be on aesthetics – the things you learned in the *The Non-Designer's Design Book*. Although you may copy others' design ideas, the content should be yours.

Here is an example of a framed document with two frames.

```
<!DOCTYPE html PUBLIC "-//W3C//DTD XHTML 1.0 Frameset//EN" "http://www.w3.org/TR/xhtml1/DTD/xhtml1-frameset.dtd">
<html xmlns="http://www.w3.org/1999/xhtml">
<head>
<meta http-equiv="Content-Type" content="text/html; charset=utf-8" />
<title>Untitled Document</title>
</head>
<frameset cols="25%,75%" frameborder="no" border="0" framespacing="0">
  <frame src="tocXHTML.html" name="LHS" noresize="noresize" />
  <frame src="mainXHTML.html" name="RHS" noresize="noresize" />
</frameset>
<noframes>
<body>
Content without frames.
</body>
</noframes>
</html>
```

Here is the left frame tocXHTML.html:

```
<!DOCTYPE html PUBLIC "-//W3C//DTD XHTML 1.0 Transitional//EN" "http://www.w3.org/TR/xhtml1/DTD/xhtml1-transitional.dtd">
<html xmlns="http://www.w3.org/1999/xhtml">
<head>
<meta http-equiv="Content-Type" content="text/html; charset=utf-8" />
<title>TOC</title>
</head>
<body>
<html>
<head>
<title>Table of Contents</title>
</head>
<body>
<a href="mainXHTML.html" target="RHS">Main</a><br />
<a href="otherXHTML.html" target="RHS">Other</a><br />
</body>
</html>
```

Here is mainXHTML.html:

```
<!DOCTYPE html PUBLIC "-//W3C//DTD XHTML 1.0 Transitional//EN"
"http://www.w3.org/TR/xhtml1/DTD/xhtml1-transitional.dtd">
<html xmlns="http://www.w3.org/1999/xhtml">
<head>
<meta http-equiv="Content-Type" content="text/html;
charset=utf-8" />
<title>Main Document</title>
</head>
<body>
Main document.
</body>
</html>
```

Here is otherXHTML.html:

```
<!DOCTYPE html PUBLIC "-//W3C//DTD XHTML 1.0 Transitional//EN"
"http://www.w3.org/TR/xhtml1/DTD/xhtml1-transitional.dtd">
<html xmlns="http://www.w3.org/1999/xhtml">
<head>
<meta http-equiv="Content-Type" content="text/html;
charset=utf-8" />
<title>Other document</title>
</head>
<body>
Other document.
</body>
</html>
```
