

In our regular work we provide Firearms Tactics instruction to police officers from around the region. We offer you quality instruction, from experienced and trained instructors at the collegiate level.

We will train you in the skills you will need if you are going to carry a firearm in self-defense. And we can back that training with years of experience and active research for the most up to date information.

These are not tips that someone read in a book, these are skills gleaned from years of training police officers using the most modern experiential training and reality based force-on-force modules.

The classes will be small so that we can provide you with the attention that you are looking for. There will be no more than sixteen people in any one class so you will have plenty of opportunities to interact and learn from the instructors.

Don't worry about not having a firearm or equipment. We provide everything. We will provide you with a firearm, ammunition, and safety equipment. And, we will provide a chance to learn. We even provide lunch.

***No Personal Firearms PLEASE**
