

Why Missourians Will Support A Fair and Equitable Overhaul of Our State Tax Structure

- “One-time fixes” erode public confidence in government.
- Clearly, by definition, the state is running out of “one-time fixes.”
- Permanent tax changes that don’t improve tax equity will disproportionately affect low-and-middle-income Missourians — and won’t win approval of the voters at the polls.
- Failure to resolve budget problems at the state level transfers the problems to local governments, which inevitably means Missourians will be asked to pay more unfair, inequitable taxes.
