

I KNOW, NOBODY GIVES A SH-- BUT HERE IT IS???????

This is really scary!

One Hundred Dollars

Ten Thousand Dollars

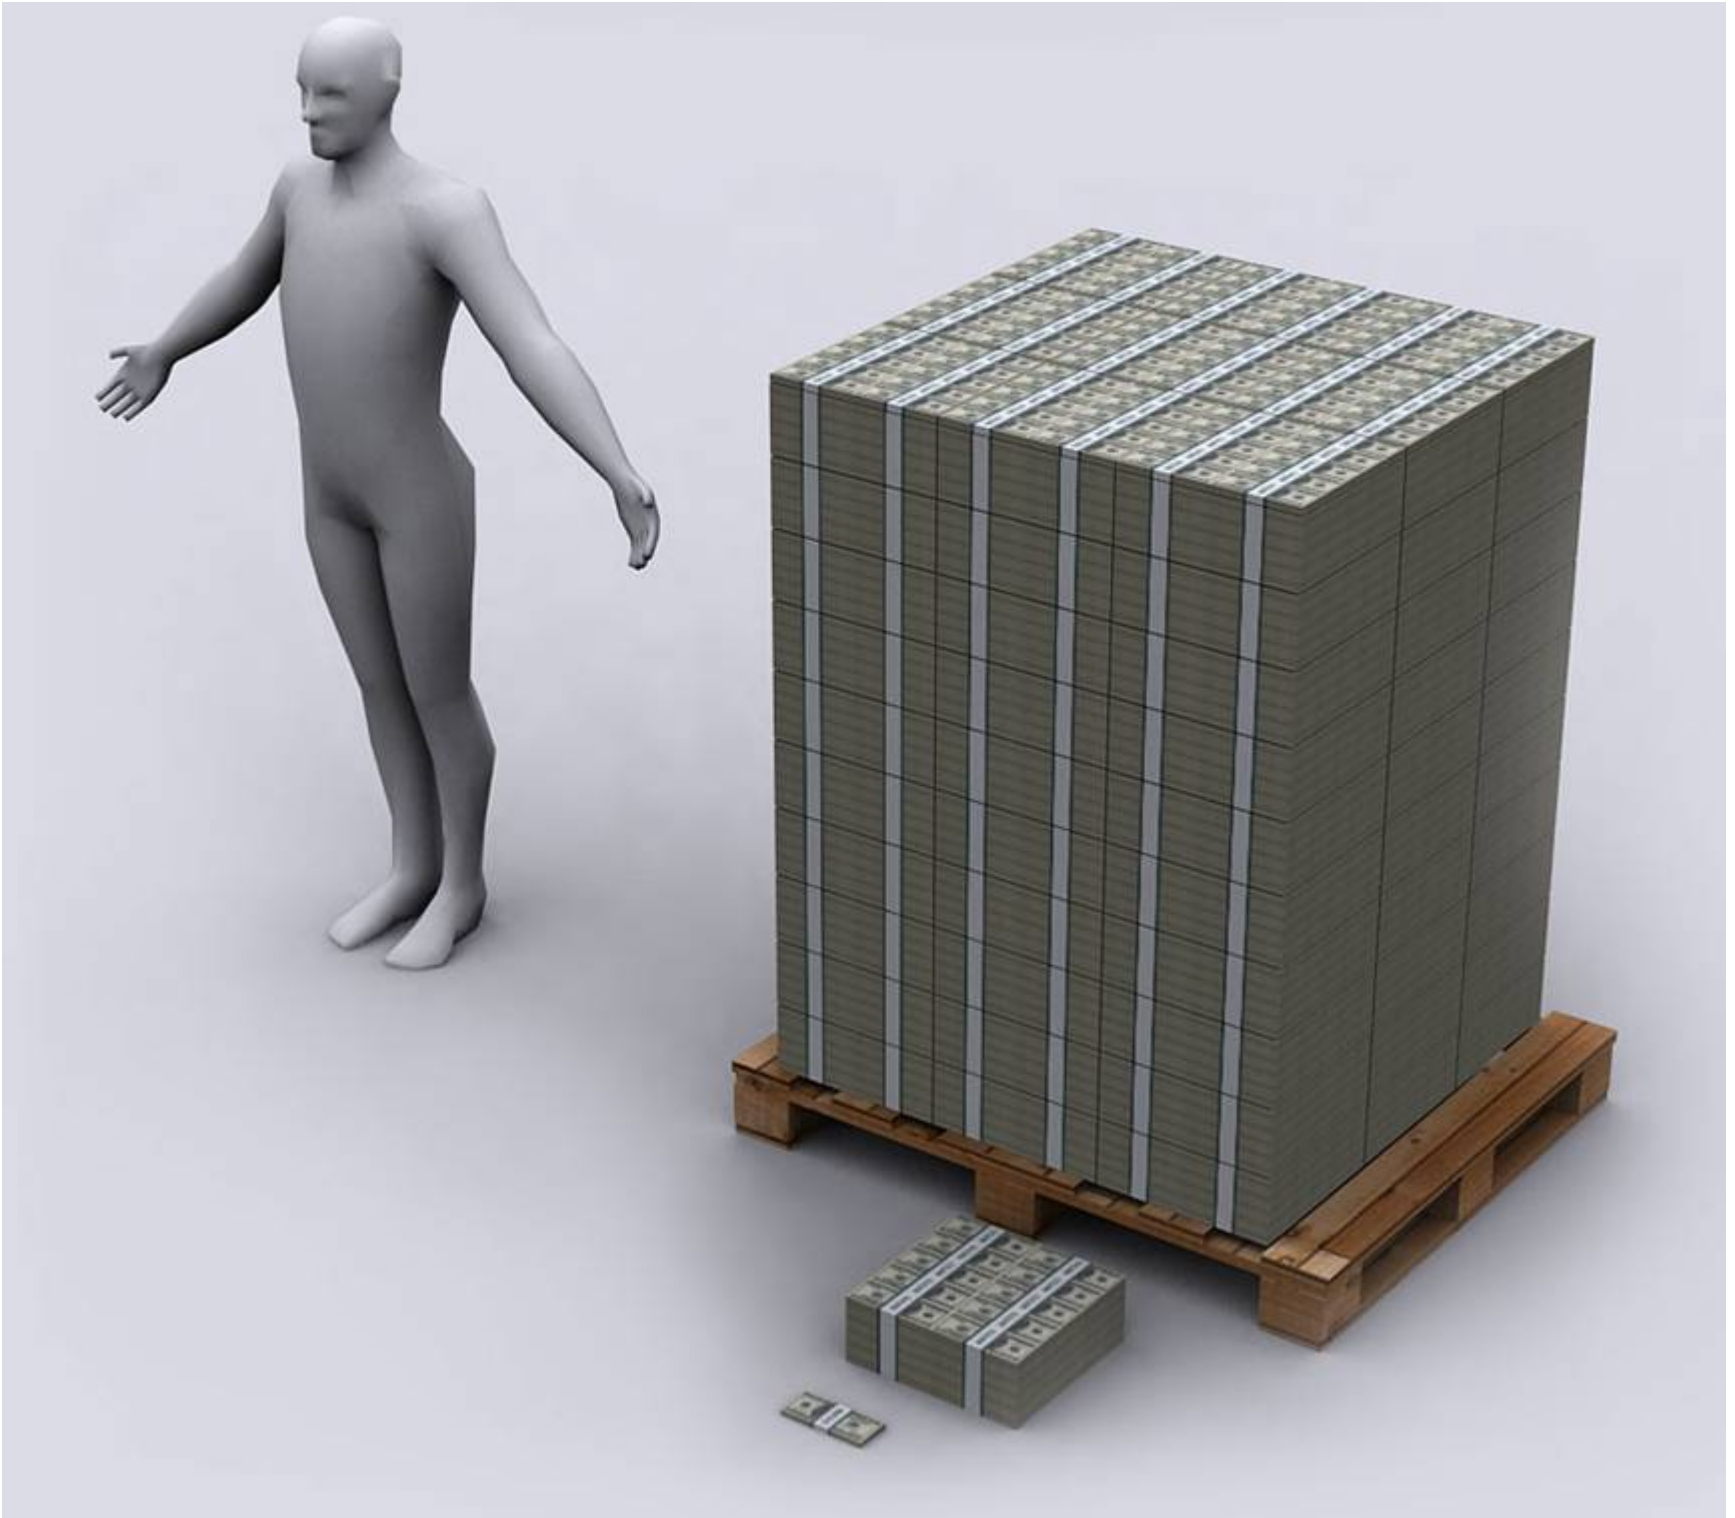

One Million Dollars

\$1,000,000 - Not as big of a pile as you thought, huh?

One Hundred Million Dollars

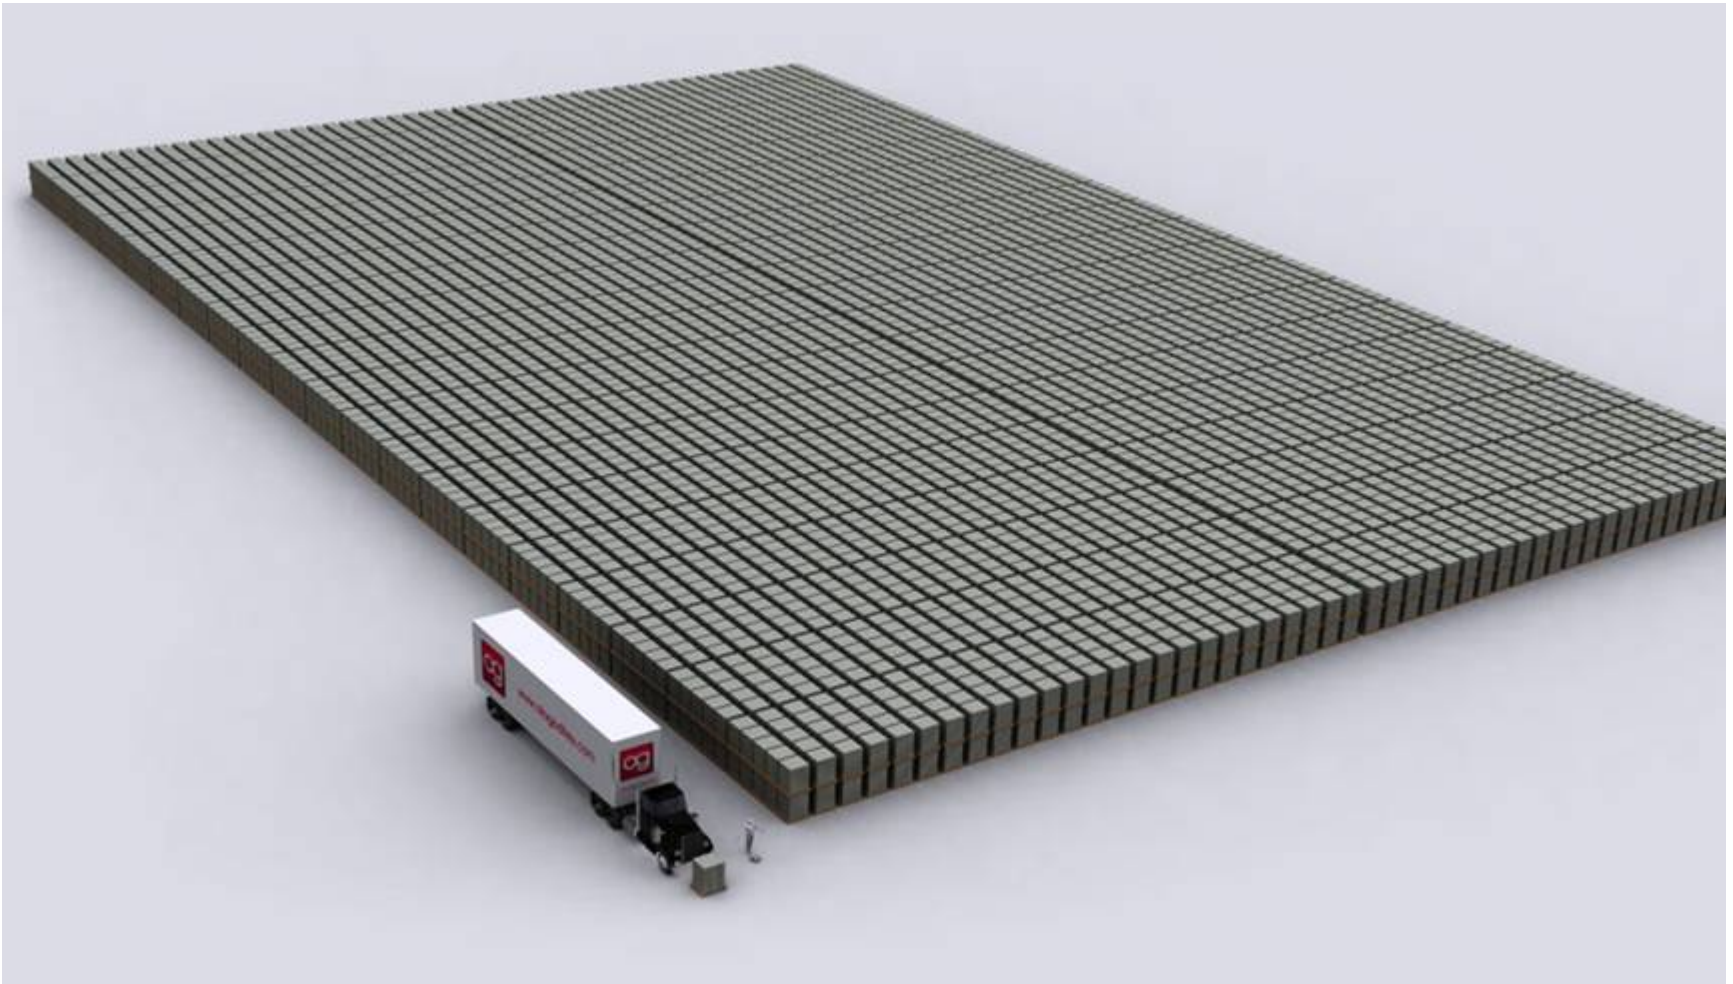

One Billion Dollars

\$1,000,000,000 - Now we're getting serious!

One Trillion Dollars

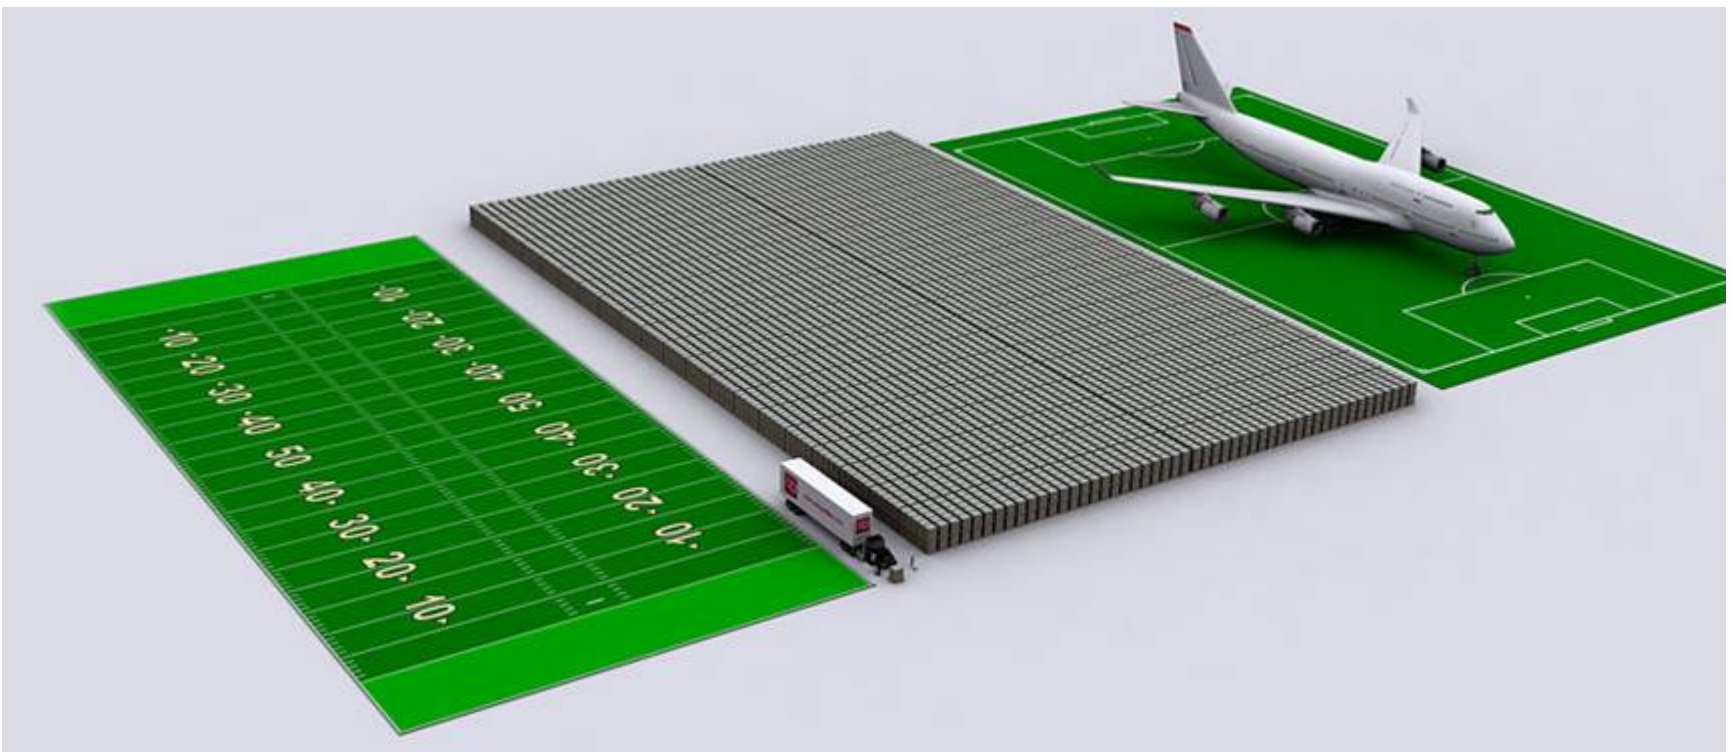

\$1,000,000,000,000

When the U.S government speaks about a 1.7 trillion deficit - this is the volumes of cash the U.S. Government borrowed in 2010 to run itself.

Keep in mind it is double stacked pallets of \$100 million dollars each, full of \$100 dollar bills. You are going to need a lot of trucks to freight this around.

If you had spent \$1 million every day since Jesus was born, you would have not spent \$1 trillion by now...only ~ \$700 billion the same amount the banks got during bailout.

One Trillion Dollars

Comparison of \$1,000,000,000,000 dollars to a standard-sized American Football field and European Football field. Say hello to the Boeing 747-400 transcontinental airliner that's hiding on the right. This was until recently the biggest passenger plane in the world.

15 Trillion Dollars

\$15,000,000,000,000 The US national debt (credit bill) topped the 15 trillion mark two months before Christmas 2011. Statue of Liberty seems rather worried as United States national debt passes 20% of the entire world's combined GDP (Gross Domestic Product). In 2012 the National Debt will exceed 100% of GDP, and venture into the 100%+ debt-to-GDP ratio that the European PIIGS have (bankrupting nations).

114.5 Trillion Dollars

\$114,500,000,000,000. Total US unfunded liabilities

To the right you can see the pillar of cold hard \$100 bills that dwarfs the WTC & Empire State Buildings - If you look carefully, you can see the Statue of Liberty.

The 114.5 Trillion dollar super-skyscraper is the amount of money the U.S. Government knows it does not

have to fully fund the Medicare, Medicare Prescription Drug Program, Social Security, Military and civil servant pensions. It is the money the USA does not have to pay all its bills.

If you live in the USA, this is also your personal credit card bill; you are responsible along with everyone else to supply this money! The citizens of USA created the U.S. Government to serve them, this is what the U.S. Government has done while serving We The People.

The unfunded liability is calculated on current tax and funding inputs, and future demographic shifts in US Population.

Note: On the above 114.5T image the size of the base of the money pile is half a trillion, not 1T as on 15T image. The height is double. This was done to reflect the base of Empire State and WTC more closely.
